

The FCC's upcoming decision to allow LPFM to replace stations heard from FM Translators will have a major effect on one of my favorite stations. K-LOVE is a non profit Christian station that offers easy listening music and uplifting comentary. It is the only radio station of its kind in this area. It provides safe music for me and my children to listen too, free of all the nasty language, inuendo, advertisements, and other nasty things I have to listen to on the other available stations. It's been around, enjoyed, and supported all over the US for many years. It also offers other services like prayer support and lines for people that are interested in hearing more about K-LOVE or Christianity in general, or even just an ear to listen to a troubled heart. In this day and age there is very little of ANY of this available any where, let alone here where I live. Please do not make the mistake of removing this station from the air by allowing others to override it.
